

# Client Spotlight - Daviess County, IN

Located in rural southern Indiana, Daviess County has unique assessment requirements due to a significant Amish population as well as numerous oil/gas wells. The County has been an XSoft® client since 2008 and currently maintains approximately 22,000 parcels using XSoft CAMA™. The County Assessor's team of 7 employees manages CAMA data utilizing 1 server (virtual) and 8 desktop clients.

With a variety of oil/gas exploration companies maintaining numerous oil and gas wells across Daviess County, the Assessor's office relies on the oil & gas component of XSoft CAMA™ to automate the valuation of oil & gas well records. This includes managing owner/operators, interest holders, lease information, valuation factors, royalty and working interests and all information necessary for the proper allocation of value in calculating assessed value. As a result, the Assessor's office is extremely efficient in the fair and equitable assessment of mineral rights.

Daviess County also uses XSoft Engage™ to provide online access to public information such as:

- **Property location**
- **Ownership**
- **Owner history**
- **Sales information**
- **Assessed value and value history**
- **Land and improvement information**
- **Building sketches and photos**
- **Property Record Cards (PDF format)**
